

**Table Summer flounder ABC Projections for 2024-2025.** The projections assume that the Federal Register published final 2023 ABC of 15,023 mt will be caught. The OFL presented for 2023 corresponds to that final 2023 ABC. The OFL projections for 2024-2025 use the updated FMSY proxy =  $F_{35\%} = 0.451$ . The projections sample from the estimated recruitment for the most recent 12 years (2011-2022; ranging from 27 to 43 million and averaging 36 million) and assume that the OFL CV = 60% per MAFMC SSC precedent.
