

**Table Scup ABC Projections for 2024-2025.** Projections from the 2023 MTA model (data through 2022) used stock sizes adjusted for retrospective error to estimate the catches and SSB for 2024-2025. The projections assume that the Federal Register published final 2023 ABC of 13,458 mt will be caught. The OFL presented for 2023 corresponds to that final 2023 ABC. The OFL projections for 2024-2025 use the updated FMSY proxy =  $F_{40\%} = 0.190$ . The projections sample from the estimated recruitment for 1984-2022 and assume that the OFL CV = 60% per MAFMC SSC precedent.
